SOCIAL MEDIA ANALYSIS

# Speculara

Social media analysis for teams that need to know what to post next.

**Marketing Teams** **Ad Agencies** **PR Agencies**

THE PROBLEM

# Views, saves and sales arrive scattered across platforms

### Scattered data

Every platform reports in its own format.

### Manual reading

Teams decide what worked, why, and what is next by hand.

### Slow decisions

By the time the report is done, the trend has moved.

TARGET MARKET

# Who Speculara is built for

- Marketing Teams
- Advertisement Agencies
- Public Relations (PR) Agencies
- Brand Strategists
- Market Research Analysts

Teams that need to raise ad effectiveness on social media: planning content, proving results to clients, and spotting what the audience wants next.

HOW IT WORKS

# From page link to a clear next step

1

## Connect

Paste a page link or try sample data.

2

## Collect

Posts and engagement are gathered.

3

## Analyze

Six engines run on the data.

4

## Act

Chatbot and action list guide you.

Trend context comes from historical scraping of social media as a whole, not only your page.

PREDICT

# Forecasts, accuracy and trend longevity

**Accuracy: 88%**

## Trend longevity

How long will this trend last? Based on similar past trends, current traffic and audience sentiment.

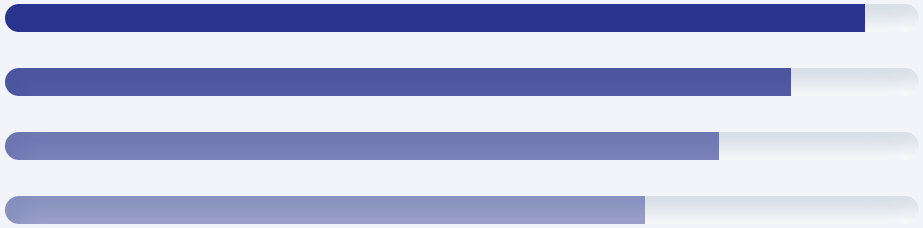

**~8 weeks**

Phase: Peaking

RECOMMEND

# Similar items and a next-action brand strategy

## Ranked matches

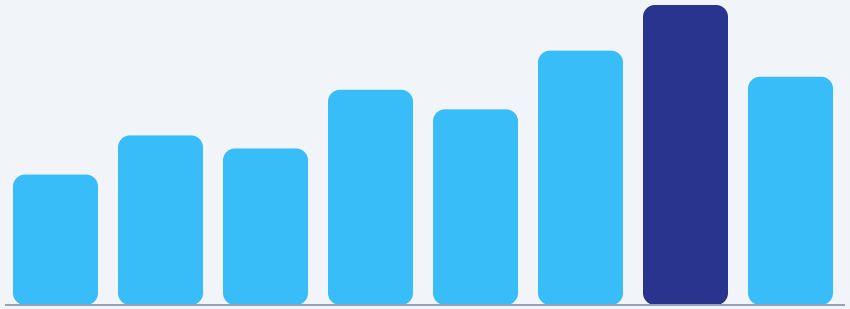

## Next actions

- Open with a 3-second hook
- Reply to comments in the first hour
- Turn top questions into a follow-up
- Partner with a mid-size creator

CHARTS

# Trends, stats, views and likes at a glance

Views by month

**248k**
Views

**19k**
Likes

**4.1k**
Saves

**512**
Sales

CORRELATION

# What moves together

## Key relationships

- Recommended to Comments
- Comments to Views, per trend
- Likes to Saves
- Comments to Sales

Association, not proof of cause.

SENTIMENT

# Keywords, tone and how each post type lands

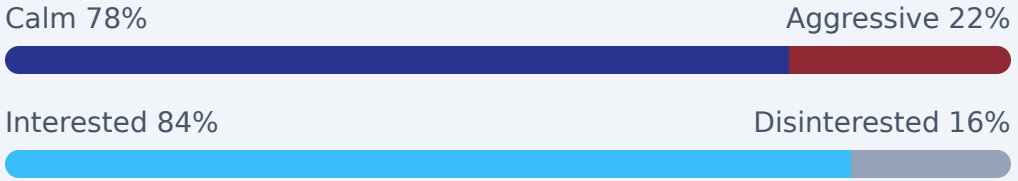

## Keywords

love it · quality · where to buy · price · shipping · restock · amazing

**68%** Good

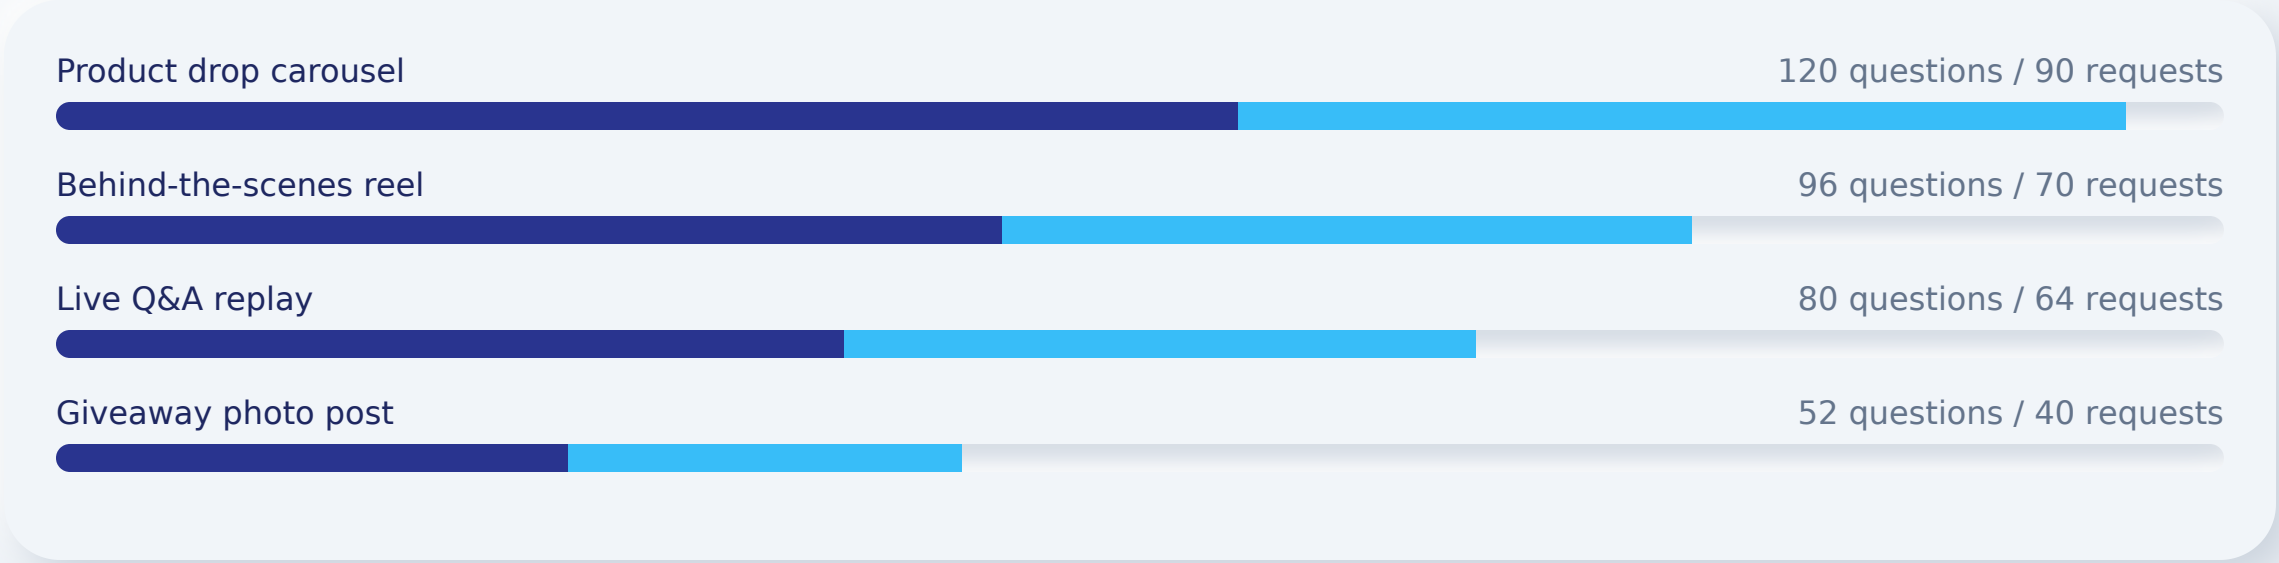

**9%** Bad

## Video posts

DEMAND

# Which posts people want more from

DESIGN PRINCIPLES

# UI and UX built around the user

### Clear hierarchy

Raised means act, pressed means selected. One primary action per area.

### Progressive flow

Add a link, scroll and choose, then explore others in tabs.

### Accessible and mobile

Large touch targets, labels, focus rings, readable contrast, reduced motion.

### Ask anything

A chatbot explains outputs in plain language.

### Honest data

Accuracy and limits are always visible.

### Try first

Sample data lets anyone explore before connecting.

NEXT STEPS

# Make every post a measured decision

### Connect live data

Replace sample estimates with real scraped history.

### Backtest with agents

Measure if decisions improve versus raw numbers.

### Weekly reports

Scheduled briefs that agents can act on.

## Speculara

See your audience clearly.
