SOCIAL MEDIA ANALYSIS

Speculara

Turn scattered numbers into your next ad decision.

Marketing Teams **Ad Agencies** **PR Agencies**

THE PROBLEM

Views, saves and sales arrive scattered across platforms

Today

Teams read numbers by hand, guess what worked, and guess what to make next.

Hours

lost per weekly report

With Speculara

Paste a page link and get predictions, strategy and plain-language answers in one place.

Minutes

to the next decision

BUILT FOR

- Marketing Teams
- Advertisement Agencies
- Public Relations (PR) Agencies
- Brand Strategists
- Market Research Analysts

HOW IT WORKS

One pipeline, from page link to a clear next step

1

Connect

Paste a social media page link, or try sample data.

2

Collect

Posts, views, likes, saves, comments and sales are gathered.

3

Analyze

Six engines predict, recommend, chart, correlate, read sentiment and demand.

4

Act

An assistant explains results and a ranked action list says what to do.

SIX QUESTIONS

Pick a question. Get an answer.

Predict

Forecast views and saves, with trend longevity.

Recommend

Similar items and a next-action brand strategy.

Charts

Trends, stats, views and likes at a glance.

Correlation

Which measures move together, per trend.

Sentiment

Keywords, good or bad tone, calm or aggressive.

Demand

Which posts draw requests and questions.

THE EXPERIENCE

Scroll and choose, then explore

Soft UI, clear hierarchy

- Raised items are actions. Pressed items are selected.
- First pick shows first, others sit in tabs below.
- Large touch targets and a mobile-first layout.
- An in-page chatbot explains any output.

ACCURACY

88%

Depends on amount of data and range of date

NEXT STEPS

Make every post a measured decision

Connect live data

Replace sample estimates with real scraped history.

Backtest with agents

Measure if decisions improve versus raw numbers.

Weekly reports

Scheduled briefs that agents can act on.

Speculara

See your audience clearly.
